Tero Parviainen (@teropa) was talking about building your own AngularJS at Scotland.js, these are my notes from his talk. There is my code and everyone else's code. I can live with my code - other people's code intimidates me. I understand my own code, that's not quite as true with other people's code.

As part of my continuous learning; I started reading Tero Parviainen 's 'Build your own AngularJS ' about 6 months ago. After 6 months and 127 commits, I am grateful I completed the book. While I didn't take notes while reading, some ideas stood out. Thus, this post describes some of the concepts I have picked up from the book.

Build Your Own Angular We will begin our implementation of AngularJS with one of its central building blocks: Scopes. Scopes are used for many di?erent purposes:

- Sharing data between controllers and views
- Sharing data between di?erent parts of the application
- Broadcasting and listening for events
- Watching for changes in data
