When Volvo Penta introduced the Aquamatic drive at the New York Boat Show in 1959, it was a revolution in the boating industry. The Aquamatic managed to combine the benefits of inboard and outboard engines. The solution is robust, relatively fuel efficient and located inside the boat, protected from wind, weather and water.

Re: Diesel Consumption - Volvo D2 - 55hp All displacement boats have a maximum hull speed which is 1.34 times the square root of the waterline. This also can be determined by looking at the wave action as the boat moves through the water, when the distance between the bow wave and stern wave equal the length of the boat, that is considered the boats hull speed .

Volvo Information: The four-cylinder D2-55 is the perfect choice for sailing yachts and other displacement boats. Power from low revs gives smooth operation, very low noise and vibration, and safe handling in close quarters. Fuel consumption and emissions are low thanks to an advanced combustion system.
